

"To lead people's everyday lives responsibly into the future" - this is how Hadi Teherani sees his mission as architect and designer.

Impressive work by the multitasking Teherani, dating from 25 years as an architect and 15 years as product and interior designer, was on display from 5 to 14 February 2015 in the "Architecture, Interior, Design and Sustainability" exhibition in Hamburg's Europa Passage - which was designed by Teherani himself. To mark the occasion of their 50th anniversary, the Hamburg branch of BMW at the same time presented the new BMW i8, on a stand designed by Teherani.
