

Experience the versatility.

TANGRAMis5 by Interstuhl is THE revolutionary seating solution for office, lounge and waiting areas. With its innovative angle- and modular concept, TANGRAMis5 allows the creation of a seemingly endless range of seating combinations, based on only a few modules. To demonstrate the possibilities Interstuhl has developed an app which allows the user to individually configure their own TANGRAMis5 solution and then shows a uniquely accurate image of how it will look in situ. Using the augmented reality function, the app displays the 3D product configuration in an existing room and makes it viewable from any angle. Once the user has decided on a configuration, the app can provide a country-specific price estimate and a firm quotation can be requested.

[Install the app now and plan various layouts - live in your room.](#)
