

Communication. For our success. For our future.

Interstuhl on all roads across the country. You see them everywhere, on television, in magazines, on billboards - advertising messages! Communication is the lifeblood and foundation of a successful company. Particularly well created vehicle graphics are one of the most effective solutions to draw attention. The lettering on vehicles has a personal effect and is comparable with a business card. Advertising on vehicles is not a luxury but a worthwhile investment in the future of a company. As part of the introduction and implementation of the new Corporate Design and Interstuhl's new core brand values, the vehicle appearance was reconsidered.

Our new claim ENJOY SEATING PERFORMANCE and the brand logo now travel across Europe on all our company vehicles.
