

North America's largest design exhibition for commercial interiors took place for the 45th time at the Merchandise Mart in Chicago from 10th to 12th June. More than 700 showrooms presented the latest furniture developments. One of the main trends was communication and lounge furniture, which were widely presented to visitors. Interstuhl was represented in the redesigned showroom by our partner Riviera. Riviera's exhibition space focused mainly on design and was therefore, the ideal location to present interstuhl's products such as AirPad, MOVYis3, EVERYis1 and KINETICis5. Visitors' responses for the products were great. Particularly, the feedback for new models like EVERYis1 and KINETICis5 was extremely positive.
