

The French exhibition "Bureaux Expo" for facility managers and furniture purchasers took place in Porte de Versailles from 16th to 18th April 2013. Interstuhl and its new dealer ?La Manufacture du Design? (square Edouard VII, Paris), presented strategically important chairs on a 75m<sup>2</sup> exhibition stand and on "Espace Tendances" of the renowned architect Charles Petit. "Manufacture du Design", which was just recently founded, offered visitors an exclusive and comprehensive offer. It was the perfect platform to present interstuhl?s novelties and to underline its French reputation. Numerous visitors admired the concept of the stand, the beautiful design, the precision to detail, the quality of the furniture and the professionalism, motivation and warm welcome of a dynamic team.

AirPad, MOVYis3, Volume 8, Champ, the new VINTAGEis5 collection and of course the glamorous Silver in carbon design impressed French buyers, designers and ergonomists alike. In general, the focus increasingly lies on subjects related to well-being, positive atmosphere at work, corporate identity and corporate communications. Visitors were particularly impressed by interstuhl?s ergonomics, quality and functional design. The exhibition was a great success for interstuhl and ?La Manufacture du Design? because of the development of contacts and new projects.
