

The new interstuhl showroom can be viewed in its entire splendour

At the end of January, the interstuhl showroom in Copenhagen has undergone a major redesign. The 300m² showroom is located directly in the impressive harbour of Copenhagen. Besides the strategic products for the Scandinavian market, new communication products such as VINTAGEis5, KINETICis5, NESTYis3, Ritmo, Pios and X&Y and interstuhl's classic, Silver, find sufficient presentation space. The different modules of the interstuhl meeting analysis as well as the history of the family-run company are particularly well displayed. In addition to interstuhl's product families, the brand bimos and its highlights are also presented. The newly designed showroom provides space for intensive meetings and consultations, workshops and events.
