

On 1st of March, Interstuhl held a spectacular event at Hard Rock Café Madrid. The presentation took place in an open house day. All our innovations shone like real Rock Stars and filled the space with colors.

The event was attended by many visitors including architects, designers and representatives of major spanish and international companies. Interstuhl products, especially VINTAGEis5, EVERYis1, AIMis1, UPis1 and Labsit were widely accepted and aroused great interest among visitors.

The event ended late in the evening with an excellent result that exceeded all our expectations.
