

MEXTRÓPOLI 2017

Live the extraordinary city!

Four days a year a window opens on the heart of Mexico City: Mextrópoli, where you can live the city through its architecture. This year it opened from the 11th to 14th March and citizens, students, authorities and specialists shared together thoughts about the city.

Interstuhl was present in this important festival: TANGRAMis5, EVERYis1 and Silver were displayed within the event location - also at the speaker's corner.

In brief, more than 55 thousand people attended to lectures, dialogues, exhibitions, installations, presentations, documentaries, workshops and architect tours, all set up to make us think about the city in which we want to live. It is the meeting of culture through architecture.
