

On October 10th we introduced new dimensions in the world of workspaces. Together with our distributors Bernardí and Contel we organized an event at the Convent dels Àngels in Barcelona, where our guests had the chance to experience our Active Sitting Solutions. All the Active Sitting Solutions enable a wide movement while sitting. Among the guests were architects, designers and representatives of large national and international companies, which got all surprised by Interstuhl's world-novelties **PURE^{IS3}**, **Flextech** and the **sensor S 4.0**. The event ended late at night with an excellent feedback that exceeded all expectations.
