Options

Benefit

Colour finish metal parts Brushed aluminium, silver.

Brushing is a method that emphasise the character and material properties of aluminium in a particularly genuine way. This also includes minor irregularities in the surface that make every chair/table/sideboard a unique item. A subsequently applied protecting lacquer prevents premature signs of ageing; on the other hand, aluminium is a material that tends to become more valuable the more its is used.

Castors Soft castors for hard floors.
